DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 4-9, drawn to a process of making a semiconductor device, classified in class 438, subclass 622.
- II. Claims 1-3, drawn to a device, classified in class 257, subclass 758+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as forming a first wiring layer; forming a first insulating layer containing carbon; forming a second insulating layer on said first insulating layer, the second insulating layer comprising silicon, carbon and nitrogen; dry etching contact holes through the first and second insulating layers; forming a second wiring layer within the contact holes and on the second insulating layer.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Because these inventions are distinct for the reasons given above and have a separate status in the art because of their recognized divergent subject matter, restriction for examination purpose as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
